

Group Directed Study 801: Final Project Work Assessment Worksheet

S U M M A R Y

This work sheet helps identify where your project is in the User Centered Design (UDC) process, and what project deliverables key to building a usable and successful final review project. You are then asked to answer a few questions precisely identifying what you should be focusing on for the duration of the class. This will become your contract with me in what you're expected to do to successfully pass the class.

Y O U R N A M E & P R O J E C T : Erik Hartley. STOMPBOX; Shopping application

Expected Final **Review Date:** Summer, 2014

Your project is at **which stage in the UCC process?** (Place an "X" where you think you are)

Plan	Analyze	Conceptualize	Navigation Mechanism	Wireframes	Mockups/Prototypes
------	---------	---------------	----------------------	------------	--------------------

Deliverables /stage that have been completed or not done so far in your program:

Stage & Deliverables	Completed	Not Done
Requirements Analysis		
--Project Unique Positioning Statement (aka project mission or vision)	X	
--Project objectives		
--User archetypes (aka Personas), including user goals	X	
Functional Analysis and Specification		
--Critical usage scenarios (user needs assessment)		
--Use cases (i.e., functionality for entire project; task analysis)		
Conceptual		
-- Information architecture	X	
Navigation & Input/Output Mechanisms		
Wireframes		
Mockups/Prototypes		
Usability Testing <i>(have you used any of these at any design phase?)</i>		
--Test plan & materials		
--Test scenarios		
--Test results		
--Number of iterations		
Content Development		

-- Understand my project genre (application, storytelling, experimental, educational)		

	Completed	Not Done
Other Usability Evaluation Techniques employed		
-- Use case / task analysis		
--Contextual inquiry		
--User interviews		
--Surveys		
--Focus Groups		
--Cognitive walk-through		
--Usability inspection (heuristic evals): includes competitive analysis		
--Card sorting		

What deliverables do you need to make your project successful?

A semi-functional mobile/tablet application and supporting POC video.

What areas do you need assistance over the duration of the Group Directed Studies class?

Usability testing seems to be where I'm lacking the most development.

What do you think is your next steps in your project design and development?

Re-assessing technology and objectives.

What deliverables can you commit to completing by the end of the semester in this class?

I am unsure how to answer this question, as I have been given little guidance thus far as to what my next step should be, or what is expected of me.
